Leadership 101

Defining and Developing Leaders

In Six Sessions The Course Will Cover..

- What is leadership?
- Am I a leader?
- The values of a leader
- Team leadership values
- A threefold strategy
- Development programme

Leadership is always the answer and always the problem. In today's society, everyone wants a piece of the action, but few want the responsibility that comes with it. Leadership 101 defines personal and corporate responsibility.

Leadership 101 will equip you to act!

Leadership is a gift and a skill. It doesn't take too long to discern who has it and who doesn't.

Leadership skills can be taught and individuals trained to be more effective.

Most organisations struggle to develop their own leaders and spend most of their budget hiring those with a proven skill and history of being an effective leader.

For organisations who don't have unrestricted access to H.R. budgets, there is really only one proven option open to them.

The most effective organisations are those who take time to define their vision and strategy and then structure a programme to discover and develop leaders into their philosophy and values.

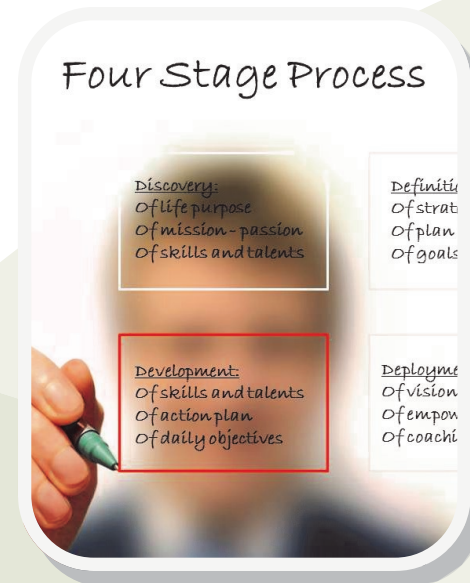

This is not a quick fix solution, but an ongoing process that will take the organisation into the

future and secure it for the next generation.

Leadership 101 is designed to put infrastructures in place for releasing the untapped human resource within church life.

Ps Tony & Denise Mckeown

Highlights Of Leadership 101

• Easy to follow notes and resources, making **Leadership 101** an effective management tool.

• Free internet downloads and resources to equip you for the daily journey.

• Distance learning makes **Leadership 101** accessible 24 / 7 and globally accessible.

• **Leadership 101** is a cost effective tool that is like having your own personal coach.

• A "self paced" course which allows you, the participant, to determine the desired outcome.

• **Leadership 101** is:
- Empowerment of self
- Development of others
- Defining strategies

• The unique Four Stage Process is an effective coaching tool within this course

LEADERSHIP IS ALL ABOUT TAKING RESPONSIBILITY.

The first rule of leadership is taking personal responsibility for moving forward.

Effective leaders embrace change and deal with any insecurities as blockages to the vision.

WHERE DO I START?

Take a deep breath and begin.

Register today!

MAKE A VALUES JUDGEMENT

The greatest asset any organisation has is not their product but their people.

Leadership 101 will take you on a journey to maximise your greatest asset (**you**)!

DISCOVER RESOURCES

Leaders are drawn to vision! All too often we work contrary to this principle.

Having resources does not guarantee leaders will be attracted to them!

Resources are attracted to vision, not vision attracted to resources.

LEADERSHIP HAS LEVELS

Good leaders lead and they are quickly de-motivated if systems hold back their passion to lead.

Continual development is essential to ensure we are all being developed further.

Taking time to restructure for growth is integral to developing an effective team of leaders.
